

The Prevention and Wellness Trust Fund (PWTF) of Massachusetts is a first-in-the-nation effort to **improve health outcomes** by combining **public health and health care strategies**.

Established by the state legislature through Chapter 224 of the Acts of 2012, PWTF received \$60 million over four years, through funding from an assessment of health insurers and large hospital systems. **The Boston Partnership, coordinated by the Boston Public Health Commission (BPHC), received \$5.35 million as one of nine partnerships across the Commonwealth.**

THE NEED

Preventable and chronic health conditions continue to climb. Furthermore, health care inequities based on race, income, and geography are a persistent challenge. Boston's Roxbury and North Dorchester communities adjoin each other; they share many cultural and social assets, institutions and aspirations. They are also home to some of Massachusetts' most vulnerable, high-risk individuals and families.

Prior to PWTF, no coordinated approach existed to address common health challenges and inequities affecting these neighborhoods. **PWTF leverages a network of health care providers, community-based organizations, residents, leaders, and existing initiatives to bring a comprehensive approach to the prevention and management of pediatric asthma, hypertension, and falls in older adults.**

CLINICAL PARTNERS

- Bowdoin Street Health Center
- Codman Square Health Center
- The Dimock Center
- DotHouse Health
- Harbor Health Services (Geiger Gibson & Neponset)
- Harvard Street Health Center
- Whittier Street Health Center

COMMUNITY PARTNERS

- Action for Boston Community Development/Head Start
- Boston Commission on Elderly Affairs
- Boston Medical Center/ Injury Prevention Center
- Boston Public Schools
- Boston Senior Home Care
- Central Boston Elder Services
- Ethos
- Health Resources in Action

BOSTON SNAPSHOT

Covers Roxbury and North Dorchester; 140,000 residents;
Health Equity: 42% Black and 23% Hispanic/Latino

Pediatric Asthma: Students with pediatric asthma in six of the eight elementary schools have an overall absentee rate 30% higher than their classmates without asthma within Boston.

Hypertension: 41% of hypertensive patients had blood pressure rates greater than 140/90.

Falls in Older Adults: Older adult fall death rates per 100,000 residents 65 years and older was 29.2 for North Dorchester and 27.2 for Roxbury.

Residents receive certificates for completing the Chronic Disease Self-Management Program, taught by Ethos and the Elderly Commission.

A COORDINATED APPROACH

The PWTF model implements evidence-based prevention approaches at a systemic level, which complements existing health care services and ongoing health care transformation efforts. PWTF focuses on extending care into the community through **clinical-community linkages**, while developing stronger evidence of effective prevention programming.

CLINICAL

Identify high risk patients, treat them according to clinical guidelines, and refer them to prevention-based programming outside of the clinical setting.

LINKAGE

Bridge services through warm hand-offs by Community Health Workers (CHWs) and electronic systems; build strong partnerships among clinical and community leaders.

COMMUNITY

Evidence-based interventions at community-based and social service organizations, i.e., Chronic Disease Self-Management, Asthma Home Visiting, Tai Chi, etc.

THE PARTNERSHIPS

PWTF supports a partnership that shares leadership among clinical, municipal, and community organizations. **The coordinating partner (BPHC) is responsible for building, monitoring, and maintaining a robust infrastructure of working relationships** that focuses on referral management, training, data collection and evaluation, and quality improvement.

THE LOCAL IMPACT

Since implementing the program, the Boston Partnership **made over 660 referrals** from clinical sites to community organizations. PWTF is proving to be an essential component in the mission to improve health outcomes and combat health inequities in our communities.
