

The Prevention and Wellness Trust Fund (PWTF) of Massachusetts is a first-in-the-nation effort to **improve health outcomes** by combining **public health and health care strategies**.

Established by the state legislature through Chapter 224 of the Acts of 2012, PWTF received \$60 million over four years, through funding from an assessment of health insurers and large hospital systems.

**The Lynn Partnership, coordinated by the City of Lynn, received \$5.3 million as one of nine partnerships across the Commonwealth.**

### THE NEED

**Preventable and chronic health conditions continue to climb.**

Furthermore, health care inequities based on race, income, and geography are a persistent challenge. Lynn is home to some of Massachusetts' most diverse, vulnerable, and high-risk individuals and families.

Prior to PWTF, no coordinated approach existed to address common health challenges and inequities affecting the community.

**PWTF leverages a network of health care providers, community-based organizations, residents, leaders, and existing initiatives to bring a comprehensive approach to the prevention and management of pediatric asthma, hypertension, falls in older adults, and tobacco use.**

### CLINICAL PARTNERS

- Lynn Community Health Center

### COMMUNITY PARTNERS

- Greater Lynn Senior Services, Inc.
- Lynn Housing Authority & Neighborhood Development
- Lynn Public Schools
- Massachusetts Coalition for the Homeless
- Metropolitan Area Planning Council

### LYNN SNAPSHOT

90,000 residents<sup>1</sup>;

**Health Equity:** 52% of patients at the clinical sites are Hispanic/Latino<sup>2</sup>; 1 in 5 lives below the Federal Poverty Level<sup>1</sup>

**Pediatric Asthma:** 15.6% of children were told they have asthma vs. 13.7% statewide.<sup>3</sup>

**Hypertension:** 31.6% of adults have been told they have hypertension vs. 28.8% statewide.<sup>3</sup>

**Falls in Older Adults:** 9.3% of residents over age 65 have experienced a fall with an injury in the last 12 months.<sup>3</sup>

**Tobacco Use:** 20.7% smoke regularly vs. 15.9% statewide.<sup>3</sup>

*"I have learned so many new things about asthma."*

Christian, age 11, of Lynn, MA, in response to his coordinated care from PWTF.

## A COORDINATED APPROACH

The PWTF model implements evidence-based prevention approaches at a systemic level, which complements existing health care services and ongoing health care transformation efforts. PWTF focuses on extending care into the community through **clinical-community linkages**, while developing stronger evidence of effective prevention programming.

### CLINICAL

Identify high risk patients, treat them according to clinical guidelines, and refer them to prevention-based programming outside of the clinical setting.

### LINKAGE

Bridge services through warm hand-offs by Community Health Workers (CHWs) and electronic systems; build strong partnerships among clinical and community leaders.

### COMMUNITY

Evidence-based interventions at community-based and social service organizations, i.e., Chronic Disease Self-Management, Asthma Home Visiting, Tai Chi, etc.

## THE PARTNERSHIPS

PWTF supports a partnership that shares leadership among clinical, municipal, and community organizations. **The coordinating partner (City of Lynn) is responsible for building, monitoring, and maintaining a robust infrastructure of working relationships** that focuses on referral management, training, data collection and evaluation, and quality improvement.

## THE LOCAL IMPACT

Since implementing the program, the Lynn Partnership **made over 1,130 referrals** from clinical sites to community organizations. PWTF is proving to be an essential component in the mission to improve health outcomes and combat health inequities in our communities.
