Health Data Sources

		State	County	Local
Quickly Digestible Statistics	<p>National Environmental Public Health Tracking (EPHT): The National Environmental Public Health Tracking Network (Tracking Network) is a system of integrated health, exposure, and hazard information and data from a variety of national, state, and city sources. On the Tracking Network, you can view maps, tables, and charts with data about: chemicals and other substances found in the environment; some chronic diseases and conditions; and the area where you live. http://ephttracking.cdc.gov/showHome.action</p>	x	x	
	<p>County Health Rankings: The annual <i>County Health Rankings</i> measure vital health factors, including high school graduation rates, obesity, smoking, unemployment, access to healthy foods, the quality of air and water, income, and teen births in nearly every county in America. The annual <i>Rankings</i> provide a revealing snapshot of how health is influenced by where we live, learn, work and play. They provide a starting point for change in communities. http://www.countyhealthrankings.org/</p>	x	x	
	<p>Community Health Status Indicators (CHSI): CHSI 2015 is an interactive web application that produces health profiles for all 3,143 counties in the United States. Each profile includes key indicators of health outcomes, which describe the population health status of a county and factors that have the potential to influence health outcomes, such as health care access and quality, health behaviors, social factors and the physical environment. http://wwwn.cdc.gov/communityhealth</p>	x	x	
	<p>MA Environmental Public Health Tracking (MA EPHT): This website is designed to provide you with access to current and accurate health and environmental information available for Massachusetts. A key feature of this website is that you can make tables, charts, and maps of environmental and health data for the community that you live in. https://matracking.ehs.state.ma.us/</p>	x	x	x
	<p>MassCHIP Community Health Profiles: MassCHIP provides community-level data to assess health needs, monitor health status indicators, and evaluate health programs. Health care providers, state and federal agencies, universities, community health centers, and local boards of health can all find information relevant to their fields by using MassCHIP. http://www.mass.gov/eohhs/researcher/community-health/masschip/</p>	x	x	x
	<p>Office of Data Management and Outcomes Assessment: The Office of Data Management and Outcomes Assessment (DMOA) is responsible for managing key data sets and resources while providing consistent leadership on data and research standards across the department. DMOA oversees the Registry of Vital Records and Statistics, which collects, houses, and issues data on births, deaths, and marriages, and the Massachusetts Cancer Registry, which collects and does surveillance work with cancer data on both the statewide and community level. www.mass.gov/dph/dmoa</p>	x	x	x
	<p>Web-based Injury Statistics Query and Reporting System (WISQARS): WISQARS is an interactive, online database that provides fatal and nonfatal injury, violent death, and cost of injury data from a variety of trusted sources. Researchers, the media, public health professionals, and the public can use WISQARS™ data to learn more about the public health and economic burden associated with unintentional and violence-related injury in the United States. http://www.cdc.gov/injury/wisqars/</p>	x	x	
	<p>United States Census Bureau's FactFinder: American FactFinder provides access to data about the United States, Puerto Rico and the Island Areas. The data in American FactFinder come from several censuses and surveys. The community Facts page displays, showing you the population of the geography that you entered. http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml</p>	x	x	x
Detailed Data	<p>Centers for Medicaid and Medicare Services (CMS) Data Navigator: Use the Data Navigator to find data and information products for specific CMS programs, such as Medicare and Medicaid, or on specific health care topics or settings-of-care. Navigator displays search results by data type making it easier to locate specific types of information (e.g., data files, publications, statistical reports, etc.). https://dnav.cms.gov/</p>	x	x
