

Foothills Health District

Goshen, Westhampton, Whately, Williamsburg

Protecting the Health and Wellness of Every Community

Public Health Excellence (PHE) funding has helped the Foothills Health District expand its capacity to protect the health and wellness of residents across the region. From issuing permits and conducting inspections to hosting vaccine and wellness clinics, **the District ensures that the communities, spaces, and services families rely on every day meet the highest standards of safety and care.**

DID YOU KNOW?

Before your child attends summer camp, takes a dip at a public pool, or spends a weekend at a family campground, local health inspectors have already been there. From reviewing camper immunization records and staff background checks to inspecting water safety and bathroom facilities, **your local board of health works behind the scenes to make sure the places your family enjoys most during the warm summer months are safe, healthy, and ready to welcome you.**

Inspected, Approved, and Ready for Summer

Keeping families safe all summer long takes preparation, expertise, and boots on the ground. Before each facility opened for the season, local health inspectors in the Foothills region ensured every space where families gather met state standards for safety and operation, conducting:

18

recreational camp inspections

4

family campground inspections

3

beach inspections

“Foothills Health District is committed to protecting and strengthening the health and wellness of every community we serve.”

Brian Chapdelaine, Director of Public Health
